SUMMARY

A Software developer with a B.Sc. in Software Engineering and experience building REST APIs and backend applications. Skilled in Python, JavaScript, Node.js, Express, MongoDB, SQL and NOSQL databases, with project experience in payment integration, authentication, and production API development. Data analytic and manipulating, with numpy and pandas, data visualization with matplotlib and Seaborn. I bring a practical problem-solving approach and experience collaborating across technical teams with my background working in a Tech startup environment.

EDUCATION

Lead City University **Ibadan, Oyo State**

B.Sc. Software Engineering (Second class Upper Division) (4.40/5.0) *Graduation Date: December 2024*

- Relevant Coursework: Data Structures and Analysis of Algorithms, Artificial Intelligence, Object Oriented Programming, Software Development Life Cycle(SDLC), Software Architecture, Advanced Matrix, Project management, Principle of Compilers, Introduction to Digital Systems

---

Relevant/Professional Qualification

Back-end Developer – Techy jaunt **-2026**

React Developer – New Horizon **-2024**

Bsc Software Engineering **-2024**

NYSC Certification **-2026**

Certificate of proficiency in Micrsoft Tools – New Horizon **-2024**

💼 WORK EXPERIENCE

Bincom Dev Center| Nigeria

Graphics Designer *July 2025 – July 2026*

Nigeria Brewery| Nigeria—

Software Engineering Intern | IT support, Cloud engineer, Cyber Security *March 2023 - Aug 2023*

- Documented solutions in a ticketing system (e.g., Jira, ServiceNow, Zendesk) totrack and resolve issues efficiently.
- Helped partition Users Hard disk drive and monitored cloud back-up of Users profile and transfer of files when needed.
- Set up and supported video conferencing tools (Teams, Zoom) and AV equipment.
- Provided technical support to end-users via phone, email, chat, and in-person, resolving hardware, software, and network issues.

🔧 Projects Worked On

Expense, and Inventory Management System for Individual

Technologies: Node.js, JavaScript, Visual Studios

Description: Developed and optimized APIs for inventory management, resolved critical bugs, and implemented robust unit tests to ensure system reliability.

Gig-flow

Technologies: Node.js, MongoDb, Express.js, nodemailer

Description : A secure backend for managing private notes and team access, built with Node.js, Express.js, and MongoDB.

Ai-Resume Analyzer

Technologies: React, DaisyUi, Nodejs, Tailwind, JavaScript

Description: A simple web app for creating shorter links. The user enters a URL, the app generates a short link, and the short link redirects to the original URL. A QR code can also be generated for a link.

Implement both backend web services and frontend UI using react, tailwind and daisyUI

AutoLease Backend System

Technologies: JavaScript, cloudinary, node.js, Express.js, PostgresSQL, Flutterwave, Joi, Helmet

Description: Developed a Production ready REST API for the Auto-lease peer to peer car rental marketplace.

SKILLS

Technologies: JavaScript| Python| NodeJS| TypeScript|Java| TypeScript| MongoDB| PostgresSQL| ExpressJS |Matplotlib | Pandas |

OS/Tools: Windows| Git| Github | VSCode | Postman| Visual Studio | Adobe photoshop | Adobe Premiere Pro | Adobe Illustrator | Canva | Ai tools (gemini/chatgpt,etc) | Microsoft 365(Excel, word, powerpoint,etc)

Soft Skills: Teamwork| Critical Thinking| Communication | Problem Solving
